Endorectal Coil

## 3 TESLA MRI - SARAVANA SCANS

*MR Imaging Just Reached a Higher Level of Accuracy*

*SARAVANA SCANS emphasizes its dedication to quality patient care with the installation of the **MAGNETOM Spectra 3T** System from Siemens Medical Solutions. This system brings Chennai an Ultra High Field MRI that provides the best image quality available, shorter examinations, clarity, speed and increased patient comfort.*

*The advanced imaging capabilities and higher resolution of the Siemens Magnetom Spectra provides us with the most complete, detailed pictures of the human body available today.*

### TO YOUR PATIENTS THAT MEANS

- Shortest Exam time Possible
- Most Accurate diagnosis with twice the resolution of conventional scanners
- Increased Comfort

"We strive to provide our community with a superior imaging facility and siemens technology facilitates that goal"

"The 3 Tesla MRI system ensures access to the most advanced diagnostic tools available"

"The advanced capabilities and high quality images of our system, provides more complete and detailed pictures of the entire body"

# SARAVANA SCANS

Best of Imaging

- 3 Tesla MRI
- 4D Ultrasound
- 700 Slice Cardiac CT

**NANDHANAM - KILPAUK - ROYAPETTAH**

**Dr. SARAVANAN KANNAN, M.D., R.D., (PGIMER)**  
Managing Director & Chief Radiologist

We are health experts  
united to perform at the  
highest standard.

# WHY 3 TESLA MRI?

FASTER

STRONGER

IN DETAIL

BEST

NANDHANAM - KILPAUK - ROYAPETTAH

Those amazingly detailed images give doctors more information and **“greater confidence in diagnosing disease condition, resulting in earlier disease detection and a better treatment plan”**

with a higher potential for success. with quality information provided by 3T MRI, Saravana Scans.

**“IF A PICTURE IS WORTH A THOUSAND WORDS, THEN 3T MRI IS AN ENCYCLOPEDIA.”**

## Strength

1.5T MRI

3T MRI

Saravana Scan 3T MRI creates a magnetic field twice as powerful as a 1.5T MRI, and 10 to 15 times stronger than open or lower field MRIs.

Given the tremendous technological improvements achieved with 3T MRI technology, you should request 3T MRI when you prescribe MRI test for Your patients.

## Speed

1.5T MRI

3T MRI

Typical scan Times on a 3T MRI average 15 Minutes versus 30 minutes on 1.5T MRIs. Faster scans means less chance any movement during the scan will cause image distortion or blurring requiring you to be scanned. with 3T MRI, your patients can be in and out faster.

## Clarity

1.5T MRI

3T MRI

Compared to lower strength MRIs, a 3T MRI provides superior images with finer anatomic detail and clarity, making it especially beneficial for analyzing conditions of the brain, spine, musculoskeletal and vascular systems.
